V: If you come to my town. Please come to the beach.

私の街へ来たのなら。どうぞ海辺に来てください。

On the sand around the foreshore, someone is singing again today.

波打ち際の砂の上、今日も誰かが泣いています。

It's a shooting star from the sky.

それは空から降った流れ星。

If someone finds it, it will surely be able to return to the starry sky.

誰かが見つけてくれたなら、きっと夜空に戻れると。

Now it waits for someone to pick it up.

拾われるのを待ってます。

V: My town is a windy town.

My town is a foggy town.

Nothing flamboyant.

Nothing grandiose.

My town is a treasure box.

A town lit with small treasures galore.

私の街は風の街。

私の街は霧の街。

派手なものなどないけれど。

大げさなものもないけれど。

私の街は玉手箱。

小さな小さな沢山の、宝物が灯る街。

# A city Made known by sand3

Welcome to Muroran City Science Museum. 本日は室蘭市青少年科学館にようこそお越しくださいました。

We would like to briefly introduce Muroran City, a place where you can see the starry sky.

この星空の見える室蘭の街を, 少し紹介いたします。

Muroran is a town located in Etomo Peninsula, which juts out into the Pacific Ocean. ここ室蘭は太平洋に突き出した半島, 絵鞆半島にある街です。

Muroran has been known since olden days for its suitable natural port and has developed as a heavy industrial city centering on the steel industry.

古くから天然の良港として知られ、鉄鋼業を中心とした重化学工業の街、物づくりの街として発展してきました。

On the west side facing Hakucho Bay, there is an industrial zone where iron works and oil refineries are located. 白鳥湾に面した西側は、鉄工所や製油所が並ぶ工場地帯、

The east side facing the Pacific Ocean is dotted with scenic areas of unspoiled nature. 太平洋に面した東側には,手つかずの自然が残る景勝地が点在し,

In particular, the sand at Itanki Beach, which is one of Japan's 100 Most Beautiful Beaches, is known as "singing sand" despite its proximity to urban areas.

特に日本の渚100選にも選ばれたイタンキ浜の砂は、市街地の近くにありながら、鳴り砂であることで有名です。

On the coastline extending from Itanki Beach, a range of scenic areas designated as national scenic spots are frequented by many visitors. そのイタンキ浜から続く海岸線には、国の名勝にも指定された景勝地が連なり、多くの人々が訪れています。

The sun rises from the horizon and sets in the horizon because Muroran is surrounded by the sea in three directions.

三方向を海に囲まれているため、この街では太陽が水平線から昇り、そして水平線へと沈 みます。

Observing Hakucho Bay at night from viewpoints scattered around the city enables you to see scenery that gives the impression that the city is floating in the starry sky. 夜には市内から点在する展望台から白鳥湾をながめると、まるで街が星空の中に浮かんでいるような光景を目にすることができます。
